Profile: A history of process-driven DevOps, Android/Java, web development, infrastructure and network work, troubleshooting, support, and software development efforts using Linux/Unix, MacOS and Windows platforms.

- **DevOps/Infrastructure Management:** Puppet-driven, source-controlled repeatable infrastructure deployment (large webserver Linux installations including virtualized and AWS servers). Development process improvement, deployment, process-driven practices.
- **Drupal/PHP Development:** Maintained many modules and provided core patches on Drupal.org, active open-source community member. Presenter at several Drupalcons and other events.
- **Android app development (Java):** Implemented significant updates in a widely used app, including Google Maps support, API access, UI redesign, etc.
- **Education/Training:** Always active in mentoring others and formal training. Formally trained in education. Presenter at many Drupal conferences.
- **Network Development and Support:** Linux/Unix Network and System Administration, TCP/IP, DHCP, Samba, Postfix/Sendmail, NIS, Automounter, git, Web servers including Nginx and Apache.
- **Programming Languages:** PHP, Java, Puppet, Javascript/jQuery, C#, C++, C, Perl, Bash/Shell, SQL, XML, Ruby+Rails+Cucumber.
- **Network Development:** HTTP, HTML, DNS, Proxy servers. Sockets, extensive TCP/IP in general, PHP, MySQL.
- **Windows:** Visual C#, .NET, Kernel-mode device drivers. Windows Server, DHCP, DNS, WINS. Most Windows expertise is pretty stale as of 2016.
- **Database development and administration:** MySQL, MS SQL Server.
- **Linux/Unix Development:** Network/Kernel/Protocol development.

Experience:

2003-present: Randy Fay, LLC, Palisade and Denver, CO

Infrastructure/Devops development, web development in Drupal/PHP, Ruby/Rails with MySQL and SQL Server backends, Android app development in Java.

2001-2003: Sybase Corp, Englewood, CO: Senior Staff Software Engineer

XML Development and design including XSLT, DOM, SAX, and related technologies. Promoted/evangelized quality software techniques, maintained, documented, and stabilized a core component of the architecture..

1997-2001: Peak Software Solutions, Littleton, CO: Senior Software Engineer

IT Department Head (Linux/Unix/Windows Planning, Design, Implementation). Designed and developed wireless communications products. Designed and implemented system infrastructure for the company, routing, security, DNS, email, backups, and extensive policies and procedures development.

1996-1997: Platinum Technology, Englewood, CO: Senior Software Engineer

Designed and developed Windows NT Kernel-mode Device Driver as core component of network sniffing analysis tool, Unix & NT System Administration.

1996: Standard & Poor's Compustat, Englewood, CO: Senior Systems Analyst

Conceived, architected, designed, and led a team to implement a completely new HTTP product running on WinNT.

1991-95: Evolving Systems, Inc., Englewood, CO: Senior Software Engineer

Designed and developed kernel-level communications software for the emerging CDPD (Cellular Digital Packet Data) technology, resulting in successful delivery of a CDPD MD-IS system running on in a Sparc/Solaris environment. Led teams to develop various Unix telco software solutions.

1991 Minicomputer Systems Boulder, CO
Senior Software Engineer (Unix/C and MS-DOS)

1988-1991 Technical Comm. Services Denver, CO
Principal, Software Developer

1982-1988 CSI Denver, CO
Software Developer (C and BASIC, Embedded systems)

Education:

MSCS, University of Colorado at Denver, 1996
BA History/Education, Adams State College, 1980.
Secondary Teacher Certification
